PROFESSIONAL SUMMARY

Computer Technology undergraduate and Software Engineering Intern experienced in building full-stack web and mobile applications. Proficient in TypeScript, JavaScript, Python, React, React Native, Node.js, NestJS, PostgreSQL, Prisma, and Docker, with hands-on experience developing business workflows, APIs, and role-based systems.

SKILLS

Languages	JavaScript • TypeScript • Python
Frameworks	React • React Native • Node.js • NestJS
Databases	PostgreSQL • MySQL • Redis
DevOps / Tools	Docker • Git • AWS • Linux • Postman
AI	Generative AI • LLM Integration • RAG • Prompt Engineering

EXPERIENCE

Web & Mobile App Developer Intern Aug 2026 – Present
ideaForge Technology Limited, Navi Mumbai

- Developed features for iF FleetDesk, an internal fleet management and employee transportation platform supporting five user roles across web and mobile.
- Built a 4-step booking workflow supporting Passenger, Passenger + Material, Material-only, on-behalf-of bookings, named passengers, multi-stop routes, and Local/Outstation trips.
- Worked on vehicle availability, capacity matching, driver assignment, dispatch, reassignment, and trip workflows with validation of conflicting vehicle/driver commitments.
- Developed Scheduled Services/Rides with configurable routes and timings, occurrence reservations, capacity management, cancellation/no-show handling, and operational workflows.

Software Engineering Intern Dec 2025 – Apr 2026
Mintskill HR Solutions LLP

- Built Node.js backend services, Redis-powered background job queues, and REST API integrations with ATS/CRM platforms for workflow automation.
- Designed modular services for asynchronous processing, maintainability, and improved API responsiveness.

PROJECTS

Deskdrop – Local-First Cross-Device Continuity [Live](#) | [GitHub](#)
Rust, Kotlin, Swift, C#, WebSockets, mDNS. Built a local-first continuity platform connecting Android, macOS, Windows, and Linux with a shared Rust networking core. Implemented encrypted peer-to-peer file sharing, clipboard sync, camera/call continuity, automatic discovery, resumable transfers, and resilient peer reconnection.

LINEUP – Multi-Tenant Interview Platform
Next.js, NestJS, PostgreSQL, Redis, JWT. Architected a multi-tenant backend with strict row-level isolation and authentication. Built reporting, caching, and OCR ingestion pipelines processing 1000+ candidate records per upload.

GitSummarizer
React, Flask, Python, GitHub API. Developed an NLP-powered repository analysis tool that extracts repository metadata and generates contextual AI summaries locally using Qwen 2.5 3B Instruct.

EDUCATION

B.Tech in Computer Technology, RT-MSSU	2023 – 2027	CGPA: 7.3
HSC (PCM CS), Stann Knowledge Campus, Mumbai	2022 – 2023	82.33%
SSC, St. Willibrords High School, Mumbai	2020 – 2021	71.80%

CERTIFICATIONS

AWS Cloud Practitioner (2026) | Artificial Intelligence – Certiport (2025) | Deep Learning – Skillsoft (2025)
Databases – Certiport (2024) | HTML & CSS – Certiport (2024)
